Dear Franklin Cruz, President of Direct Environmental Corp.,

Re: Bigbelly Solar Powered Compactor Testimonial

We're extremely pleased with our Bigbelly compactors and recommend them highly to any municipality seeking to become more efficient and environmentally pro-active. Here in Kearny, we have found that having Bigbelly compactors in high traffic areas such as in the business district and in our recreation areas, helps to discourage the disposal of domestic waste in public waste receptacles, eliminate trash overflow and reduce bag change runs by an average of 90%.

As with all mechanical equipment, having good customer support is essential and that is what we get from Franklin Cruz and his staff at Direct Environmental Corp., a Certified New Jersey Minority Business Enterprise and distributor of the Big Belly Solar Powered Compactor.

Kenneth Pincus
