

# “NEW BEST PRACTICES”

## TOM 1040™ – Touchless “Smart” Waste Compaction for Public Places

**TOM** saves time, space, and energy, and all of that saves you money. Holding up to seven times more waste than a conventional waste bin and featuring hands-free operation, **TOM** also keeps your environment tidy and hygienic.

### SMART, SELF-ADJUSTING SETUP

Thanks to a built-in sensor, **TOM** can tell when there’s a low traffic period (30 minutes or more without anyone approaching). During that time, **TOM** compresses the trash and keeps it compacted. This allows the trash to begin breaking down and increases the overall amount of waste **TOM** can hold.

### TOM COMMUNICATES

A modem-based communication system enables **TOM** to send an SMS or E-mail when the bin is full or the **TOM** units need maintenance.

Cut Labor Costs up to 80%

### MORE PRODUCTIVE USE OF TIME

Less time spent on waste handling, more time devoted to customers and core activities.

### BETTER HYGIENE

**TOM** contributes to creating a clean, orderly, and inviting environment. The automatic shutter is completely touch-free.

### VOLUME REDUCTION

More compaction = fewer trips to the landfill. Less transportation required results in lower transportation costs and reduced CO<sub>2</sub> emissions.

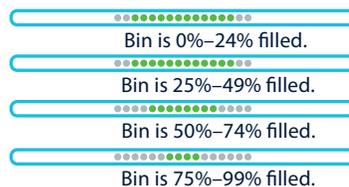

### EASY TO WRAP

**TOM** has a modern and durable finish that works in any environment. But if you’re looking to customize with your brand’s colors or design, wrapping is easy!

### STATUS INDICATOR

**TOM**'s easy-to-read status indicator always lets you know how things are going.

And red for when the bag is full.

When the door is closed and waste is compacting, a yellow light moves back and forth

### AUTOMATIC DOOR

**TOM** has a motion sensor and opens the shutter automatically, allowing for hands-free operation. Additionally, the shutter can be programmed to stay open during peak times.

### LOW MAINTENANCE

Because it’s built by TOMRA, **TOM** is designed to be tough, dependable, and easy to maintain.

Dimensions					Utilities	Capacity
Width	Depth	Height	Transport Height	Machine Weight	Power	Compaction Ratio
24"	29"	4'9"–4'11"	5'4" incl. pallet	246 lb.	100-240 V, 50/60 Hz	up to 7:1
